Group Projects

1. General. You have group projects due at the end of the term. How best do we form groups?

3. Specific.

   (a) Three to five people per group.

   (b) At most one 508 student to a group.

   (c) Everybody will write their own class files for the group project, so authorship of each file is known. (In fact, I’ll want an explicit statement of authorship for each file.)

   (d) Projects must be “linguistic”.
